Introduction

This international conference will be organised by IWW Water Centre (DE), RSC (UK) and SCI (UK). A scientific poster session and an exhibition related to the topics of the conference will be included. It is expected that more than 200 attendees from all over Europe will take part. You will have the opportunity to talk to decision makers from water companies and regulators. The relevant scientific community will also be present.

The programme comprises eleven keynote speakers and some twenty speakers from the call for papers.

Call for Posters

The call for posters is open, and the closing date for submissions is 19th September.

Who should attend?

This conference is aimed at water companies, public health professionals, drinking water quality regulators, suppliers of laboratory and on-line monitoring equipment, analytical chemists, and academic and industry researchers working in the area of disinfection byproducts.

Features of the conference

- Discussion rounds at the end of each session
- Exhibition and poster sessions in every refreshment break
- Dedicated exhibition and poster session on Monday afternoon
- Two-minute oral poster presentations
- Poster prize awards ceremony
- Conference dinner with Mülheim Water Award ceremony
- Conference proceedings available to purchase, published by the Royal Society of Chemistry (€65 including speakers' full papers)

Registration and Fees

Registration is now open and fees are:

Member of the RSC, SCI, IWW, or WG

495€ Non-member

250€ Post-doctoral research assistant

Post-graduate or undergraduate student

A late fee of 45€ will be added to all payments received after 19th September.

Local Information

The Municipal Hall (Stadthalle) is located in central Mülheim, alongside the river, and is the conference and dinner venue. Dusseldorf International Airport is less than 30 minutes away by train, and a list of suggested accommodation available is posted on the website.

Exhibition Opportunities

A related trade exhibition will be hosted, and details of what is offered are posted on the website. The exhibition will be in the same area as the catering and posters, and there will be a dedicated poster and exhibition session on Monday evening with drinks reception.

1,250€ Exhibition stand and one trade stand staff (no access to programme)

1,450€ Exhibition stand and one full delegate (with access to technical programme) 240€ Additional exhibition trade stand staff (no access to technical programme)

Additional optional exhibitor opportunities include:

- a single printed promotional page in the bound delegate handbook (gratis)
- a two-minute promotional oral presentation to the conference audience (gratis)

Sponsors

We are grateful to our confirmed sponsors:

18:20 Introduction to the exhibition	18:10	
	18:30	Exhibition, poster session and refreshments

Programme

	<u>ıy, 28th October</u>
09:00	Session 3: Formation and Treatment of DBPs
	Chairman: K Clive Thompson, ALcontrol Laboratories (UK)
09:00	DBP treatment and removal: putting first things first
	Simon Parsons, Scottish Water (UK)
09:30	Role of bromide in the formation of disinfection by-products: kinetic and
	mechanistic considerations
	Urs von Gunten, Eawag (CH)
10:00	Effects of ozonation and UV-disinfection on NOM fractions and BDOC: experiences
	from full-scale WTPs in Norway
	Bjørnar Eikebrokk, SINTEF (NO)
10:20	Influence of main matrix constituents oxidative processes on pollutant degradation
	and by-product formation
	Holger Lutze, University of Duisburg-Essen (DE)
10:40	Questions and discussion
10:50	5 x two-minute poster presentations
11:05	Poster session, exhibition, and refreshments
11:40	Session 3: Formation and Treatment of DBPs (continued)
11.40	Chairman: Hervé Gallard, University of Poitiers (FR)
11:40	Minimizing nitrogenous disinfection by-product formation in impaired waters
11.10	Bill Mitch, Stanford University (USA)
12:10	Role of bromide for N-nitrosamine formation from nitrogen-containing precursors
12.10	during ozonation
	Saskia Zimmermann-Steffens, EPFL (CH)
12:30	NH_4^* -N/NO $_3^*$ -N ratio: a surrogate measure for organic matter oxidation by OH
12.50	radicals and ozone
	Glen de Vera, University of Queensland (AU)
12:50	Impacts of ferrate treatment on DBP formation
12.50	David Reckhow, University of Massachusetts (US)
13:10	Lunch
13.10	LUTIOT
14:10	Session 3: Formation and Treatment of DBPs (continued)
	Chairman: David Schwesig, IWW Water Research (DE)
14:10	Disinfection by-products in recycled water: occurrence, health risk and factors
	that influence formation
	Kathryn Linge, Curtin Water Quality Research (AU)
14:40	5 years on - performance assessment of 3 MIEX® systems in northern England for
	DBP pre-cursor removal
	Fadi Akkawi, Orica Watercare (UK)
15:00	Removal of DBPs and precursors by high pressure membranes
	Katrin Doederer, University of Queensland (AU)
15:20	Questions and discussion
15:30	Exhibition, poster session, and refreshments
15:30	Exhibition, poster session, and refreshments

Programme

16:10	<u>ry, 28th October</u> (continued) Session 4: Health and Toxicology
	Chairman: Susan Richardson, University of South Carolina (US)
16:10	New developments in toxicologically monitoring of DBP
	Tamara Grummt, Federal Environment Agency (DE)
16:40	Overview of human health effects associated with DBP exposure
	Cristina Villanueva Belmonte, CREAL (ES)
17:10	Bioanalytical quality assessment of disinfected drinking water: the polar, the volatiles and the unknowns
17 00	Daniel Stalter, University of Queensland (AU)
17:30	Managing uncertainty in the provision of safe drinking water John Fawell, Cranfield University (UK)
18:00	Questions and discussion
19:00	Conference dinner
17.00	Connecence uniner
Wedne	sday, 29 th October
09:00	Session 5: DBPs in Swimming Pool Water
	Chairman: Torsten Schmidt, ZWU, University Duisburg-Essen (DE)
09:00	Pool water DBPs - drowning in disinfection by-products?
	Christian Zwiener, University of Tübingen (DE)
09:30	Bioanalytical and chemical evaluation of disinfection by-products in swimmin
	pool water
	Beate Escher, UFZ (DE)
09:50	Reaction kinetics of chlorine with human body fluids in swimming pool water Pei Hua, Technical University of Dresden (DE)
10:10	Correlation between different disinfection by-products in swimming pool wa and trihalomethanes in exhaled breath after swimming
	Laia Font-Ribera, CREAL (ES)
10:30	Questions and discussion
10:45	Exhibition, poster session and refreshments
11:25	Session 6: DBP Regulations and the Future
	Chairman: Tamara Grummt, Federal Environment Agency (DE)
11:25	The regulation of disinfection by-products
	Matt Bower, DWQR for Scotland (UK)
11:55	DBP formation from the chlorination of organics in tea and coffee
40.45	Thomas Bond, Imperial College London (UK)
12:15	Questions and discussion
12:35	Poster prize awards ceremony Torsten Schmidt ZWU, University Duisburg-Essen (DE)
12:45	Lunch
13:55	Summaries on Sessions 1-6 (10 minutes per session)
14:55	Round-table discussion with moderator
15:40	Final summing up
15.50	Closo
